EVENT MANAGEMENT
IN THE 21ST CENTURY

As a rule, the bigger the convention, the more complex its IT infrastructure is. Not only are convention participants voracious communication users, but the media relies on an uninterrupted connection with the outside world. Communication networks also have to be available and, most importantly, secure at all times. On top of everything else, the organizer also has to stop on top of all the other technical support. Event IT is one of the most undervalued areas in event management.
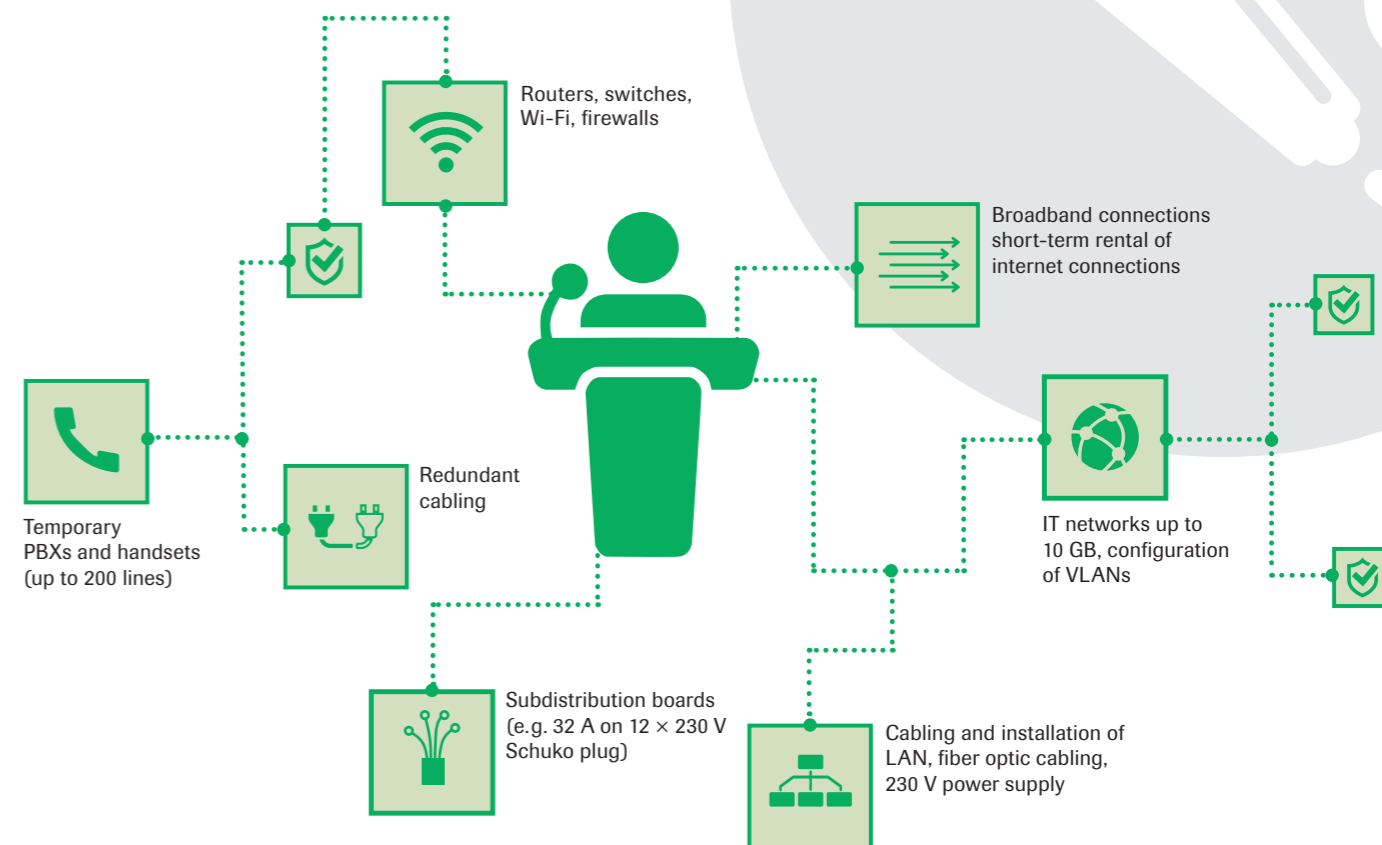

SECURE AND ALWAYS AVAILABLE
THERE'S NO EVENT WITHOUT RELIABLE IT

The calendar is always packed with political and economic events that are usually attended by busy VIPs. For these events to go off without a hitch, they need to be organized perfectly and professionally. That is tough to do, especially as standards rise in an age of advancing digitalization.

It is not uncommon to have to set up a self-sufficient IT infrastructure for the duration of the event. The infrastructure must be correctly dimensioned and secured: If it is undersized, it could jeopardize the success of the entire event. If oversized, it will cause unreasonably high costs. Finding the right balance is our specialty: Infraserv Höchst's event IT professionals will handle the design, implementation and operation of the entire temporary IT infrastructure for you, especially Wi-Fi, LAN and phone networks.

We sit down with you in advance to determine what equipment you need. We install everything in time for a first trial run and ensure that everything works smoothly and securely until the event is over. Then, we provide post-event support to make your next event experience even better. We lighten your workload and lay the foundation for a successful event. Having our IT professionals at your side provides the assurance that your equipment is reliable and lets you focus on the "meat" of your event without distractions. Try our service today!

OUR EQUIPMENT FOR YOUR EVENT

Routers, switches, Wi-Fi, firewalls

Broadband connections short-term rental of internet connections

Temporary PBXs and handsets (up to 200 lines)

Redundant cabling

IT networks up to 10 GB, configuration of VLANs

Subdistribution boards (e.g. 32 A on 12 × 230 V Schuko plug)

Cabling and installation of LAN, fiber optic cabling, 230 V power supply

---

OUR SERVICE PORTFOLIO IN DETAIL

BEFORE THE EVENT	DURING THE EVENT	AFTER THE EVENT
• Conducting needs analysis and designing infrastructure • Providing temporary PBXs with handsets and fax devices • Providing equipment (routers, switches, Wi-Fi etc.) • Providing broadband connections – short-term rental for internet connections • Providing temporary networks up to 10 GB, configuring VLANs • Providing power subdistribution boards, cabling and installation • Installing redundant cabling • Installing temporary Wi-Fi networks including firewalls • Wi-Fi heatmap • Managing and coordinating trades	• Securely operating temporary networks • Providing IT support for the event • Monitoring internet lines • Port security and cybersecurity • Ensuring failure safety of network operation	• Removing equipment • Documenting, analyzing, preparing status reports of the event • Discussing feedback, lessons learned, special occurrences (network fluctuations, attacks, capacity) with customer • Managing change requests

YOUR BENEFITS:
EVENT GOAL ACHIEVED, IMAGE BOOSTED

• Your event is a success
• Your IT operation is secure
• Reliable IT infrastructure design and budgeting
• Event is executed by a partner who has years of experience and excellent references
