**GET YOUR NEXT PROJECT APPROVED QUICKLY**

BImSchG, IED, WHG, AwSV, UVPG, GenTG, DGRL, BauGB, BauNVO, ASR, VV TB, MindBauRL and EN ISO – all these abbreviations stand for laws, regulations, guidelines and standards that matter to plant and equipment operators. And that ignores a host of other laws and administrative rules and a constant stream of new laws that necessitate modifications to your plants and equipment. This is a huge challenge – and not just for small and medium-sized companies, either. Even global players find permit management to be costly and time-consuming.

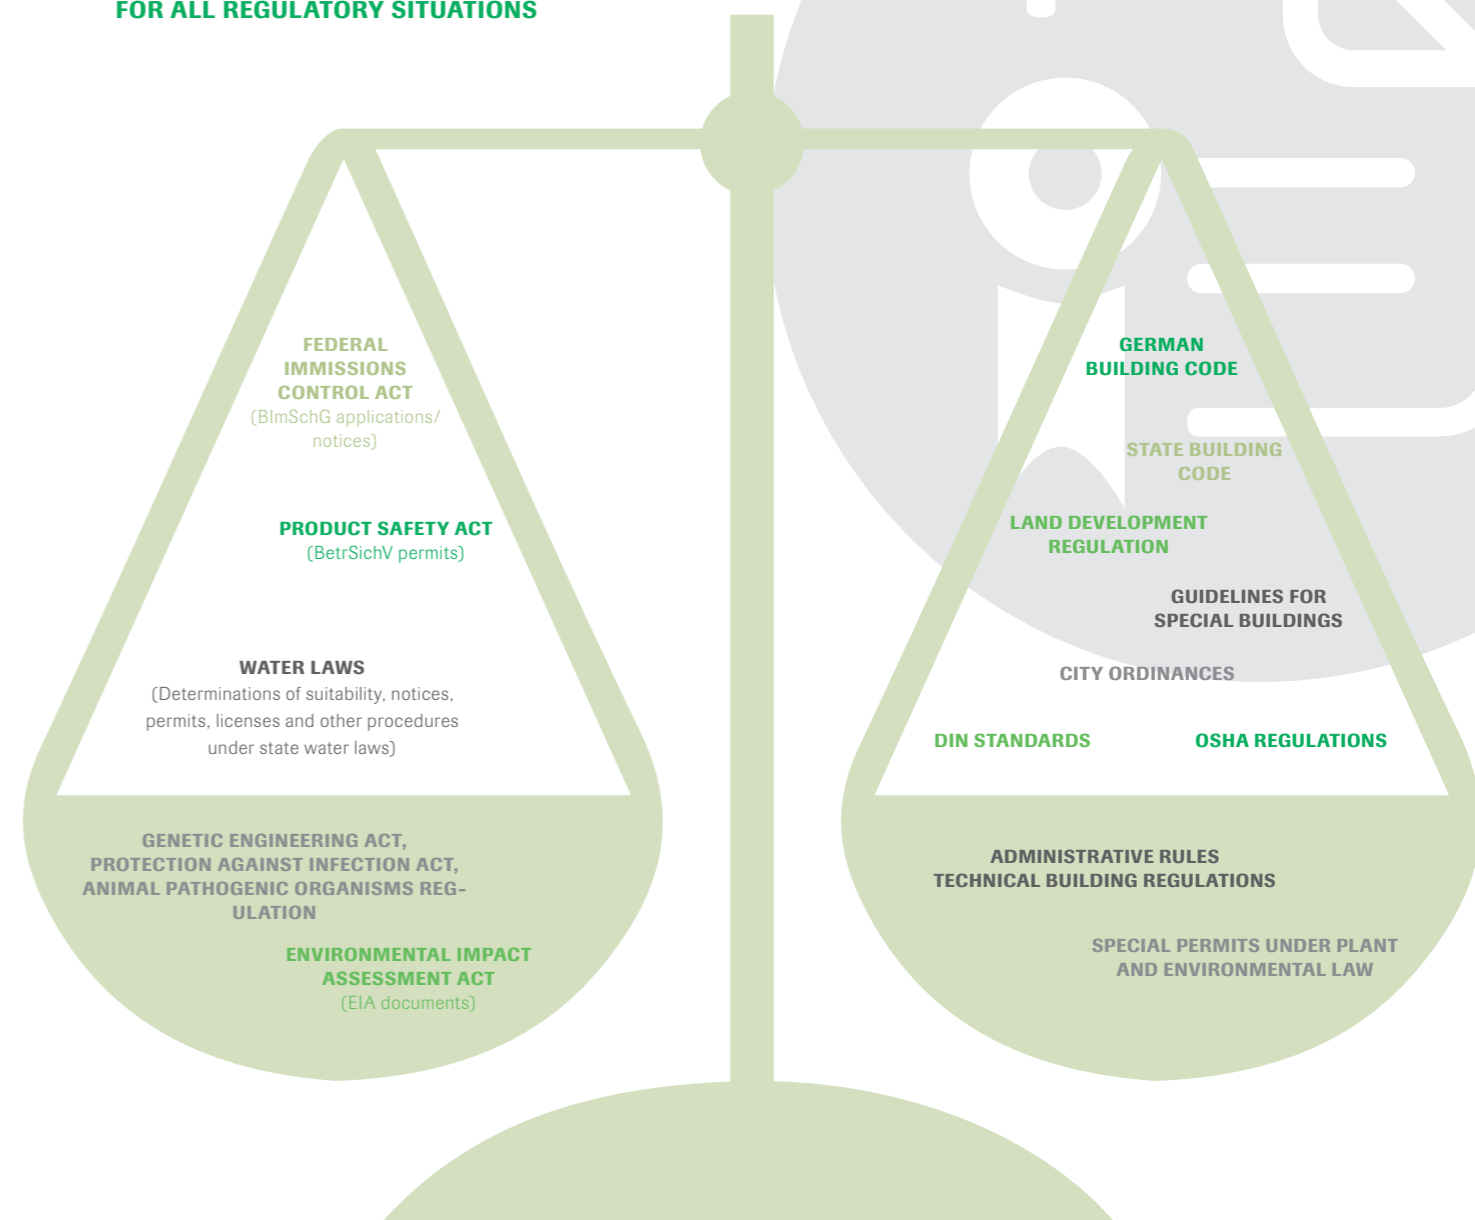

# EXPERT ADVICE AND ASSISTANCE FROM APPLICATION TO FINAL PERMIT

The construction and operation of chemical and pharmaceutical process equipment is heavily regulated – and for good reason. It has to meet strict standards for environmental protection, fire protection, radiation protection, health and safety and comply fully with building codes for structures built below and above ground. Managing the permits involves everything from calling the local department of public works to communicating with federal ministries to liaising with EU agencies.

Roughly 800 laws, 2,700 regulations and 4,700 administrative rules lay out the requirements for operating plants and equipment. It takes an expert guide to navigate this regulatory jungle and file a permit application based on a process design. We will draw up all the application documents you need to obtain a final, legally watertight permit as quickly as possible. After all, your competitive edge depends on getting your plants and equipment commissioned on schedule.

Infraserv Höchst is a seasoned service provider and equipment operator who knows all the requirements that industrial plant operators have to meet. Permit management is part of our stock-in-trade. Through our active involvement in trade associations, we always stay on top on the latest legal developments. Put this expertise to work for you: We can walk you through the entire permitting process, if you wish: from the conceptual design to the application right up to the final permit. Turn to us if you need a compliance officer, expert witness and consultant, too.

## PERMIT MANAGEMENT FOR ALL REGULATORY SITUATIONS

### OUR SERVICE PORTFOLIO IN DETAIL

- Thoroughly assessing the legal requirements, consulting on technical and legal issues and preparing your permit documents
- Supporting you throughout the entire permitting process for applications and notices:
  - > Managing projects with specific deadlines
  - > Fielding inquiries from government authorities
  - > Attending hearings held by permitting authorities
  - > Reviewing permit notices
  - > Assisting with appeals and lawsuits if needed
- On-time commissioning of your plant
- Convenience and reduced workload
- Professional permit management and final, legally robust permits
- Applications filed on time
- Complete support throughout the permitting process

### YOUR BENEFITS:

- Preparing for and performing site inspections / discussions with government agencies
- Coordinating and obtaining statements and expert opinions
- Handling all types of correspondence with government agencies and expert witnesses
- Monitoring standards and participating in efforts to adopt changes to laws
- Tracking permit conditions with a management system database
